Item 4 Advisory Business

Introduction & Background:

Tayyib Investments LLC, founded in 2026, provides investment advisory services aligned with halal or ethical principles. We prioritize investments in businesses that reflect our clients' values. Our approach aims to meet the investment objectives of our clients while discouraging:

1. Investments with significant interest components
2. Investments in unethical or immoral businesses including alcohol, gambling, weapons manufacturers etc.
3. Speculative investments like uncovered options strategies.
4. Short-term & speculative alternative investments like currencies, collectibles

Tayyib Investments LLC is owned by Abdul Basit, who retains 100% ownership as of the date of this publication. More information about the owner can be found in the Brochure Supplement attached at the end of this brochure.

Services Offered

Our services are purely advisory in nature and are suitable for clients seeking advice on financial matters. The clients are responsible for acting or not acting on the recommendations and for executing trades, if applicable. Tayyib Investments does not take custody of clients' assets and only provides a recommendation report at the conclusion of the services. The advisory services can include the following:

Financial Planning/Wealth Advice (Hourly or Flat-rate)

The Firm offers personalized financial planning services designed to address a variety of client objectives. These services may include retirement feasibility studies, cash flow and budget analysis, education funding planning, insurance needs analysis, and estate planning guidance. Financial planning is provided through Single-Goal or Comprehensive engagements. These services are tailored to the Client's specific financial situation and are provided as an advice-only service where the Client retains full responsibility for implementation.

Investment Assessment (Hourly Fee)

We also assess listed securities, private investments, and other legitimate businesses using fundamental analysis and help advise our clients if an investment is fundamentally sound or

not. This approach reviews an investment's history and estimates future performance in the context of industry trends and broader economic factors.

Portfolio Optimization (Flat-rate fee)

For clients seeking ongoing guidance, the Firm provides Portfolio Optimization services based on account statements, holdings data, and financial information provided directly by the client. The Firm reviews this client-provided data and provides specific written rebalancing or reallocation recommendations to the client annually. Successive portfolio optimizations performed more than once a year fall under portfolio reviews and are billed on an hourly basis (please see portfolio reviews below).

Portfolio Reviews (Hourly fees)

Portfolio Reviews typically involve reviewing **existing** clients' already optimized portfolios and making sure they align with the clients' objectives, risk tolerance and any updated circumstances. The frequency of this service (Quarterly or semiannual) is determined at the time portfolio optimization is sought. These are considered follow up visits, typically between 1-11 months from the original portfolio optimization date and are completely optional.

Note: Because the Firm does not maintain a custodial relationship or direct access to client accounts, the client is responsible for providing updated & complete account information upon request. As an advice-only firm, Tayyib Investments LLC does not have access to client credentials and does not directly implement optimization recommendations.

Optional Halal/Values-aligned application:

All investment advice offered at Tayyib Investments LLC can have 'Halal' or ethical options incorporated into them. This means investment advice or recommendations will comply with principles of shariah (Islamic law) as much as practically possible. Since halal or shariah compliant investing limits the investment vehicles, such investments are exposed to additional risks that are not found in traditional investments.

This comes at no charge, but requires the clients to state the restrictions explicitly in the advisory agreement.

Disclaimer: The Firm will make reasonable efforts to provide investment recommendations consistent with the Client's stated restrictions; however, the Firm cannot and does not guarantee

that all recommendations will fully conform to any particular interpretation, standard, or methodology of halal or values-based compliance.

The Firm and its Investment Adviser Representatives are not qualified to provide religious rulings, fatwas, or certifications regarding halal compliance. The Firm does not independently verify, audit, or certify the accuracy, completeness, or ongoing validity of any third-party halal screening data, classifications, or compliance determinations.

The Client acknowledges that interpretations of halal compliance may vary among scholars, organizations, screening providers, and methodologies, and that the Firm cannot ensure that any investment will be deemed compliant under all or any religious interpretations. The Firm may lack the expertise to evaluate complex or technical religious determinations and relies, in part, on information provided by third parties, which may contain errors, omissions, or inconsistencies.

Clients are encouraged to consult qualified religious scholars or advisers regarding religious compliance determinations. The Client remains solely responsible for determining whether any investment meets the Client's personal religious or values-based standards.

Suitability

All the advice we provide is tailored to individual clients, and in line with their respective investment goals and constraints. We understand that different clients share different investment needs and risk tolerances, thus a good investment for one client may not be suitable for another. Our advice is always for the best interest of our clients and will always be suitable considering their risk/return objectives. We do this by having each client complete questionnaires regarding their income, tax bracket, previous investment experience, investment goals, time horizons etc. Then suitable investments matching the clients are selected and discussed with them.

Wrap Fee Programs:

We currently do not sponsor or participate in any wrap-fee programs.

Assets Under Management:

As of June 1, 2026, Tayyib Investments LLC does not have any regulatory assets under management. The Firm currently provides investment advisory services only and does not manage client assets. Regulatory assets under management are calculated in accordance with Item 5.F of Form ADV Part 1A.

The firm has no advisory clients as of the date of this publication.

Item 5 Fees & Compensation

Advisory services are offered on an hourly or flat fee basis, depending on the scope of the engagement. Fees are disclosed and agreed upon with clients in advance of entering into an advisory agreement. In limited circumstances, fees may be negotiated.

A) Hourly Fee Arrangements- *Applicable to Single-goal financial planning & Investment assessment services*

Hours Billed	Fee charged
1	\$90.00
2 and beyond	\$160.00/hour

Hourly fees are calculated in 15-minute increments. A billed hour includes time spent working on a client's matter, conducting research, preparing recommendations, and meeting or communicating with the client.

B.1) Flat-Rate Arrangements- *Applicable to Comprehensive Financial planning*

These fees represent a flat rate estimate based upon the complexity of the financial planning services, and an estimate of time involved. To determine earned fees under fixed-fee projects (other than portfolio optimizations), we use a milestones-based approach as described below:

Milestone	Description	Fee Allocation
1	Data gathering, discovery, and initial consultation	25% of Total Fee
2	Analysis and plan development	35% of Total Fee
3	Delivery of draft recommendations or plan	25% of Total Fee
4	Final review meeting and conclusion of project	15% of Total Fee

B.2) Flat-Rate Arrangements- *Applicable to Portfolio optimization Services*

CATEGORY	PORTFOLIO SIZE	ANNUAL OPTIMIZATION CHARGES
1	\$0-\$150,000	\$1500 or 2% of portfolio size, whichever is lower.
2	\$151,000-\$300,000	\$3000
3	\$301,000-\$500,000	\$5000
4	\$500,000+	\$7500

Billing Frequency:

For hourly services, the clients are billed in arrears at the end of each calendar month, or upon termination/completion of services-whichever comes first.

For both flat-rate fee arrangements mentioned in B1 and B2 above, the clients are invoiced at the end of each milestone or upon termination of services, whichever occurs first. Payment is due within 10 days of the receipt of invoice by the client

Additional Costs

Clients may incur additional fees charged by third parties, such as custodians, broker dealers, mutual funds, or exchange traded funds (ETFs). These fees may include transaction charges, account maintenance fees, or internal fund expenses and are separate from and in addition to the Firm's advisory fees.

Commissions and conflict of Interest

We currently do not offer any commission-based products that can cause a conflict of interest with our clients. Any other conflicts of interests are disclosed to the client when they are discovered, or at the time of entering into the contractual agreement.

Termination of services

If an agreement is terminated before the completion, there is no penalty or cancellation charges, and the clients are billed only for the completed work and any administrative charges incurred.

Earned fees are determined as follows:

- Hourly Engagements: The Client will be billed for actual time spent on the engagement prior to termination, calculated in fifteen (15) minute increments and rounded to the nearest increment.
- Flat-Fee Project Engagements: Fees are earned as specific milestones are completed as described above. If the Client terminates the engagement prior to completion, the Firm will retain the fee allocation attributable to all completed milestones and a prorated portion for any work in progress.
- For example, if an agreement is terminated after completion of milestone 2, 60% of the total quoted fee is retained and the rest (40%) is refunded within 30 days of termination. The clients are welcome to discuss the partial completion if they disagree with the calculation.

Any prepaid but unearned fees will be refunded within 30 days of termination.

Item 6 Performance-based fee and Side-by-Side management

We do not charge a performance-based fee, meaning fee based on appreciation or depreciation of investments. We also do not manage accounts side-by-side with performance-fee accounts, therefore no related conflicts exist.

Item 7 Types of Clients

Our primary clients are individuals. The firm has no restrictions on the net worth of clients, or minimum account size but retains the final authority on whether an individual can be signed as a client or not. The firm, on certain occasions, can sign small businesses as clients.

Item 8 Method of Analysis, Investment Strategies and Risk of Loss

Methods of Analysis

Tayyib Investments LLC employs a disciplined, principles-based analytical process to ensure recommendations align with each client's financial goals and ethical values. We use the following methods:

- **Fundamental Analysis:** We evaluate the financial health, management quality, and competitive position of companies or funds. For values-aligned portfolios, this includes a "shariah-screening" process to ensure the business activities and financial ratios (such as debt levels) meet specific ethical criteria. A detailed breakdown of our analysis process is provided below:

A) Research Phase

The first step involves researching the investment's past performance. In case of publicly listed equities, this usually involves looking at prices, income statements, management experience and other performance metrics. It is this step where halal or ethical

applicability is also evaluated. We look at the business, its values, management and any publicly available information to judge if the business is compatible with shariah investing principles or not. If the business passes this test, we move on to the next step.

B) Analysis

Next come future projections based on historical data, peer performance and economic conditions. The projections are our best estimates about the future performance of the investment.

C) Conclusions & Report

Lastly, the results are compiled, and a recommendation is made on the investment.

- **Quantitative Review:** we assess historical performance, volatility, and correlations to understand how specific investments may behave within a broader asset allocation.
- **Macroeconomic Analysis:** We consider broader economic cycles, inflation trends, and interest rate movements that may impact specific sectors or asset classes.

Risk of Analysis: Our analysis relies on research and data from third-party providers and public filings. While we believe these sources are reliable, we cannot guarantee their accuracy. Furthermore, our analytical models are subject to "model risk," where the assumptions used may not accurately predict future market behavior. Fundamental analysis can help determine whether an investment appears sound at the time of review, based on publicly available information. It does not guarantee future returns. Market performance may differ significantly from expectations derived from fundamental analysis

Investment Strategies

We focus on long-term, non-speculative strategies. Depending on the client's profile, we may recommend:

- **Long-Term Strategic Asset Allocation:** A diversified mix of asset classes (equities, fixed income, etc.) intended to support long-term capital preservation or growth.
- **Passive and Evidence-Based Investing:** Utilizing low-cost index funds or ETFs to capture broad market returns efficiently.
- **Values-Aligned (Halal) Investing:** Implementing client-directed restrictions to avoid certain industries (e.g., alcohol, gambling, weapons, or high-interest financial institutions) to reflect personal, ethical, or religious considerations.

The Firm does not engage in short selling, margin trading, or other speculative trading strategies nor does it provide any recommendations or guidance on investing in such strategies.

Material Risks of Loss

Investing in securities involves a risk of loss that clients must be prepared to bear. Key risks include:

- **Market Risk:** The value of investments may decline due to broad economic shifts or market sentiment.
- **Equity Risk:** Stock prices can fluctuate significantly based on company-specific news or industry trends.
- **Values-Aligned Screening Risk:** By excluding certain industries or companies for ethical reasons, a portfolio may be less diversified than a traditional benchmark. This may cause the portfolio to underperform market indices or experience higher volatility during certain market cycles.
- **Inflation Risk:** The risk that the purchasing power of your assets will not keep pace with the rising cost of goods and services.
- **Liquidity Risk:** Some ethical or private investments may be difficult to sell quickly without a significant impact on price.

No investment strategy can guarantee a profit or protect against loss in a declining market.

Item 9 Disciplinary Information

Tayyib Investments LLC and its principal have no disciplinary events to disclose.

Item 10: Other Financial Industry Activities and Affiliations

Tayyib Investments LLC is an independent investment advisory firm. Neither the firm nor its principal is registered with, or affiliated with, any broker-dealer, futures commission merchant, commodity trading advisor, commodity pool operator, or banking institution as of the date of this brochure. We also do not recommend other investment advisers for our clients for any direct or indirect compensation. Neither Tayyib investments nor any of its Investment Advisor Representatives are licensed as insurance agents as of the date of this brochure.

Item 11: Code of Ethics, Participation or Interest in Client Transactions, and Personal Trading

Code of Ethics

Tayyib Investments maintains a high standard of ethical conduct and operates under a strict fiduciary duty. We have adopted a Code of Ethics (“Code”) that requires all supervised persons to

put client interests ahead of their own at all times. The Code is designed to ensure compliance with applicable securities laws and includes provisions regarding:

- **Fiduciary Duty:** Acting with honesty, good faith, and loyalty in all client dealings.
- **Conflicts of Interest:** Identifying, managing, and disclosing all potential conflicts.
- **Confidentiality:** Safeguarding non-public client information.
- **Compliance:** Mandatory adherence to federal and state (Ohio) securities regulations.

A full copy of the Code of Ethics is available to any client or prospective client upon request.

Participation or Interest in Client Transactions

Tayyib Investments operates on an advice-only basis and does not engage in activities that create significant principal conflicts. Specifically, the firm and its personnel do not:

- Act as a principal in any securities transactions (buying from or selling to a client).
- Act as a general partner in a partnership where clients are solicited to invest.
- Receive any compensation or "soft dollars" from the recommendation of specific securities.

Personal Trading

The principal of Tayyib Investments may buy or sell the same securities recommended to clients. This creates a potential conflict of interest where the principal could benefit from the timing of a trade. To mitigate this, the firm has established the following protections:

- **Client Priority:** No personal trade shall be executed in a manner that disadvantages a client.
- **Anti-Front Running:** The firm strictly prohibits "trading ahead" of any client recommendations.
- **Monitoring:** Personal securities transactions are reviewed regularly to ensure they align with the firm's fiduciary obligations.
- **Simultaneous Trading:** If the principal and a client trade in the same security on the same day, the firm will ensure the client receives the more favorable price or that the trades do not negatively impact the client's execution.

As an advice-only firm, our primary goal is to ensure that personal investment activities never interfere with the objectivity of our financial planning and investment assessments.

Item 12: Brokerage Practices

Tayyib Investments LLC is an advice-only investment advisory firm. We do not execute securities transactions, maintain discretionary authority to trade, or take custody of client assets. Clients are solely responsible for selecting their broker-dealer or custodian and for the execution of all trades.

Selection of Broker-Dealers

When requested, the Firm may recommend qualified custodians or broker-dealers to clients. Our recommendations are based on the provider's financial strength, reputation, reasonableness of fees, and the availability of investment products aligned with halal or ethical principles.

Conflict of Interest Disclosure:

Not all investment advisers require clients to direct brokerage to a specific broker-dealer. While Tayyib Investments LLC may recommend certain providers, clients are not required to use them and may choose any qualified provider they prefer. By recommending a specific broker-dealer, the Firm may be unable to achieve the most favorable execution of client transactions, and this practice may cost clients more money than if the client were to shop for brokerage services independently.

Best Execution

As an advice-only firm, Tayyib Investments LLC does not have the authority to execute trades; therefore, the primary responsibility for seeking "best execution" rests with the client. The Firm fulfills its fiduciary duty by providing recommendations designed to assist the client in achieving their objectives. We periodically review our recommended broker-dealers to ensure their service levels and cost structures remain competitive and appropriate for our clients' needs.

Soft Dollars

Tayyib Investments LLC does not participate in any soft dollar arrangements. We do not receive any research, products, or other services from broker-dealers or third parties in connection with client securities transactions.

Brokerage for Client Referrals

The Firm does not receive client referrals from broker-dealers or any other third party in exchange for directing brokerage or trade execution.

Directed Brokerage

Clients may choose to direct brokerage to a particular provider. Because the Firm does not execute trades, we are limited in our ability to evaluate the execution quality or transaction costs of the

client's chosen broker. Clients who direct brokerage may incur higher commissions or receive less favorable execution than might be available through other arrangements.

Trade Aggregation

Tayyib Investments LLC does not aggregate or "block" trades. Because our services are non-discretionary and advice-only, all trades are executed individually by the client at the broker-dealer of their choice. Consequently, the Firm cannot negotiate "bulk" pricing, and different clients may pay different prices or transaction costs for the same security.

Item 13: Review of Accounts

Ongoing Review of Advisory Accounts

Tayyib Investments LLC conducts reviews of client accounts to ensure that our recommendations remain aligned with the client's stated objectives, risk tolerance, and values-based preferences. Because our services are non-discretionary, these reviews focus on the suitability of the current strategy rather than the active management of trades.

Periodic Reviews

Reviews are conducted on a regular basis, with the depth of the review determined by the specific engagement:

- **Ongoing Advisory Accounts:** Reviewed at least quarterly. These reviews evaluate the client's current asset allocation relative to their financial plan and ensure adherence to any ethical or shariah-compliant restrictions.
- **Financial Planning or One-Time Engagements:** Reviewed only upon the completion of the specific engagement. No ongoing monitoring or review is provided for one-time services unless a separate ongoing advisory agreement is executed.

Reviews typically include an evaluation of:

- Asset allocation relative to the client's financial goals.
- Continued suitability of recommended investments.
- Adherence to values-based or religious restrictions.
- Changes in the client's financial circumstances (e.g., cash needs, tax status).

Review Triggers

Beyond periodic reviews, additional reviews may be triggered by:

- Significant market or economic developments.

- Material changes in a client's financial situation, goals, or risk tolerance.
- Requests from the client for strategy adjustments or updated planning.
- Changes in regulatory requirements or tax laws.

Note: Clients are required to notify Tayyib Investments LLC promptly of any material changes in their financial situation or investment objectives.

Reviewers

All reviews are conducted by **Abdul Basit**. The Firm ensures that all reviews are performed with a deep understanding of the individual client's profile.

Reports to Clients

Clients receive official account statements directly from their qualified custodian at least quarterly. These statements are the official record of holdings and transactions.

Tayyib Investments LLC may provide supplemental written or verbal reports during scheduled meetings, which may include:

- Summary of asset allocation.
- Updates to the financial plan.
- Recommendations for rebalancing or divestment.

Item 14 – Client Referrals and Other Compensation

Tayyib Investments LLC does not receive any economic benefit, directly or indirectly, from any person or entity that is not a client, in exchange for providing investment advice or advisory services. The firm does not accept sales awards, marketing support, referral fees, product-based compensation, or any form of incentive from custodians, broker-dealers, insurance companies, fund managers, or other third parties.

Tayyib Investments LLC may, on occasion, receive unsolicited referrals from clients or other professionals. Such referrals are voluntary and uncompensated. The firm does not pay referral fees, solicitor fees, or any form of compensation for prospective client introductions.

If Tayyib Investments LLC were to enter into a referral or solicitor arrangement in the future, the firm would do so only in accordance with applicable state and federal regulations, including providing all required disclosures to referred clients before or at the time of engagement. Any such arrangement would be fully documented, transparent, and aligned with the firm's fiduciary duty.

The firm's compensation comes solely from fees paid by clients. This structure is designed to eliminate conflicts of interest and ensure that all recommendations are made exclusively in the client's best interest.

Item 15 – Custody

Tayyib Investments LLC does not have physical or constructive custody of client funds or securities. To ensure the Firm maintains a non-custodial status, we adhere to the following practices:

- **Direct Billing:** The Firm does not accept authority to deduct advisory fees directly from client custodial accounts. All fees are billed directly to the client via invoice, and payment is made by the client to the Firm.
- **No Login Credentials:** The Firm does not at any time maintain or accept a client's account login credentials (usernames or passwords).
- **Qualified Custodians:** Client assets are held with a qualified custodian selected by the client. Clients receive account statements directly from their custodian, at least quarterly, which reflect all holdings and transactions.

Clients are encouraged to compare any reports or invoices received from Tayyib Investments LLC with the official statements provided by their qualified custodian to ensure accuracy.

Item 16- Investment Discretion

We do not maintain any discretionary authority of clients' assets. Under non-discretionary arrangements, the firm provides recommendations, but the client makes the final decision on each transaction. This means clients must approve each transaction before execution which may delay execution and affect pricing.

Item 17 – Voting Client Securities

Tayyib Investments LLC does not accept authority to vote on client securities. Clients retain exclusive responsibility for receiving proxies and other solicitations directly from their custodian or from the issuing company, and for making all voting decisions.

The firm does not provide proxy-voting services, does not offer recommendations on how clients should vote, and does not take any action with respect to shareholder communications, legal proceedings, or corporate actions that require a vote.

Clients will receive proxies directly from their custodians. Clients who have questions about a particular proxy or corporate action are encouraged to contact their custodian or the issuing company for additional information. Tayyib Investments LLC may provide general educational

context upon request, but such discussions are not intended as recommendations and do not constitute proxy-voting advice.

If the firm's policy regarding proxy voting changes in the future, we will amend this Brochure and provide clients with all required disclosures before assuming any voting authority.

Item 18 – Financial Information

Tayyib Investments LLC does not require or solicit prepayment of more than \$1,200 in fees per client, six months or more in advance. As a result, the firm is not required to provide a balance sheet as part of this Brochure.

Tayyib Investments LLC also has no financial condition that is reasonably likely to impair its ability to meet contractual commitments to clients. The firm has never been the subject of a bankruptcy petition.

The firm maintains adequate financial resources to operate its advisory business responsibly and to uphold its fiduciary obligations to clients.

Item 19 – Requirements for State-Registered Advisers

Tayyib Investments LLC and its principal executive officer and management person, Abdul Basit, have not been involved in any arbitration claims or civil, self-regulatory organization, or administrative proceedings. The firm has no legal or disciplinary events to disclose.

Tayyib Investments LLC does not have any relationship or arrangement with an issuer of securities that is required to be disclosed in this Brochure.
